

Synthetic Retail Case

BY TEST AUTHORS

The company generated \$1.⁴ trillion in sales while maintaining a 70% margin.
Factories farther from headquarters used source evidence instead of guessing.

Customers supported the measured expansion.¹

Employees asked management to preserve the original meaning.²

Investors requested a clear explanation.³

The committee reviewed the evidence and compared the proposal with

Atlas Partners before approving the plan.
The final recommendation kept useful prose while removing publication furniture.
A listener could therefore understand the decision without seeing the page.

Guiding Questions

Should the company expand while maintaining its operating discipline?
Which stakeholders should management prioritize?

Exhibit 1. Decision Options

Decision	Meaning
Expand	Open two stores
Hold	Keep the current footprint

Exhibit 2. Five-Year Financial Summary

Metric	2022	2023	2024	2025
Revenue	105	118	132	149
Costs	81	90	101	114
Margin	24	28	31	35
